CAREER OBJECTIVE

I am a passionate C# .NET Core MVC Developer who enjoys solving problems and building clean, efficient backend systems. Along with my backend expertise in HTML, React, JavaScript, and Tailwind CSS, I also focus on creating SEO-friendly systems and can collaborate smoothly with SEO teams to handle technical challenges. My goal is to grow as a backend developer, contribute to impactful projects, and deliver solutions that add real value to the organization.

SKILLS

Backend: C# | ASP.NET Core MVC | Entity Framework | LINQ | SQL Server | REST API | OOP
Frontend: JavaScript | React.js | HTML5 | CSS3 | Tailwind CSS | Bootstrap
SEO: SEO-Friendly System Development | Technical SEO | Google Search Console | On-Page SEO | Off-Page SEO | Performance Insights
Tools: Visual Studio | VS Code | Git & GitHub | Postman | Figma | Vercel | Screaming Frog | Ahrefs | SEMrush
Interpersonal Skills: Problem Solving | Communication | Teamwork | Collaboration | Time Management | Adaptability

PROJECTS

Retail POS

A web-based Point of Sale system built with ASP.NET Core MVC for managing retail operations.

Features:
- User Authentication: Login, Logout, and Role-based Authorization (Admin, Staff, Customer).
- Product Management: Add, Update, Delete, and View Products.
- Customer Management: Store and manage customer details.
- Purchase & Sales Management: Record purchases and sales transactions.
- Secure Session Handling and Data Validation.

Technology Stack:
Backend: ASP.NET Core MVC, Entity Framework Core, C#
Database: SQL Server
Frontend & Design: HTML, CSS, Bootstrap, JavaScript
Authentication: Identity, Role-based Access Control
